I don't need to open the switchboard right now.

1Heart brings the heebie-jeebies in its fantastic art style and use of color and sound. From the moment the game loads the first odd cut scene, you know you are in for something weird, twisted, and probably not going to make a lot of sense. That doesn't stop this title from packing everything you love about the genre into the game though. You have items that can be combined, puzzles, finding hidden objects, and feeling plenty lost 90% of the time. Veterans of the genre may enjoy the challenge that 1Heart offers, being a game that is very stingy with its hint system for better or worse. Those like me, who have some experience but only play on occasion may want to keep a handy guide on stand by as it is very easy to feel lost and confused as to what to do next. Despite this though, the puzzles are enjoyable, the game sticks to its theme unabashedly, and the voice acting guides the story, even if I found it slightly cheesy at times. In all 1Heart is a strange and twisted tale, it requires patience, luck, and most of all, lots of clicking. The game is well designed and looks fantastic. Just be aware of the nature of the beast. This isn't a game to hold your hand, simply put.

I made a video review to show off some of the features and gameplay of this game!

I hope you enjoy!

Martyr. This game is simple, but as it is simple, is beautiful. Hope there are new versions so there are corrections in some things, I definitely recommend. nice happy ending T-T. Some decent puzzles and new things to do in this dlc, not bad..not bad. Some good lore to add to the game as well.. the game is pretty good, I would recommend it if you like The Way, Lone Survivor, or Neon Chrome.. Bought this because Fatshark deserve the money, FLC and solid patches should be celebrated in this day and age.. For the amount of time I have played I really enjoyed this game. It has a lot of potential.

Things I suggest that should be added:

-Level Editor + Workshop

-Multiplayer (2-4 As Usual)

-More perks and weapons

-More maps. Every corner is filled with mystery and adventure. Definitely one of the better Sorcery! games, and here's the kicker:

All of them were good.

Just get the series. It's worth it.

Great strategy game that's got a simple design and excellent performance. I'm diggin' it.. Some problems, but overall a pretty comfy game, maybe not worth 15 dollars but if its on sale i'd pick it up. The true evolution of the S***** F***** EX series.

I loved the first arcade game, loved the second one, loved the Playstation ports.

The game runs great even on my 7 year old PC.

I can't think of many bad things to say about the game itself, so I'm just gonna press the button now, k?. I never could've imagined that a game with just blocks could make me so sad. It tells a really sad story and is challenging too. I don't regret buying it.. Stealth and remotely-detonated bombs somehow combined, challenge and high replayability... And a level editor and user-generated levels on top of that! It's a great game to kill some time, and provides a lot of bang for your buck considering it's a \$5 game. Definitely worth checking out the demo if any of that sounds at all enjoyable to you. This game surprised me.. it would be cool if you can kill the dogs because if you active the alarm your dead. Crashes my computer.. I'm amazed at the sheer amount of playability this game has every time i play it.

When i initially bought FortressCraft i wasn't expecting a 500+ hour game, Frozen Factory adds so much additional content both Early AND Late game. It's the kind of game that you can't clearly describe in a single review, There's so much to it and so much satisfaction to be had.

Can not recommend this enough after watching the hundreds of hours pumped into this by the 1 full time Dev and the huge amount of support it has recieved from the community.

Don't be indecisive, Go for it, It's ossum.. After the first few levels, I thought this might turn out to be a cutsie, easy game - I was wrong!

A lot of thought is needed.

Great bang per buck game.. Unlike other puz-builder games, we don't have wars here, so the plus is that I can focus only on building the city. Sometimes there is a problem with clicking on the appropriate box, the zoom is too big. In addition, the game is getting better - I recommend it.
